supported by

Welcome to the inaugural IUFoST Global Food Summit

Global Strategies for Sustainability of Future Food Systems

The International Union of Food Science and Technology (IUFoST) is excited to welcome you to this landmark gathering, bringing together those who can affect strategic change to policies worldwide to enable a sustainable, waste efficient food supply for all countries – third to first world.

The Global Food Summit aims to develop interactions throughout the international scientific community and forge strategic foundations for the multi-lateral development of global food safety and security policies. Outcomes will include tangible actionable items toward achievable goals for all international stakeholders and policy makers by focusing and collaborating on strategies regarding food sustainability.
